PROFESSIONAL SUMMARY

Robotics Engineer specializing in localization, SLAM, and autonomous navigation with 200+ robots deployed in real-world applications. Leading localization systems at Saha Robotik. MSc candidate in Advanced Robotics at University of Southern Denmark. Proven experience in ROS2, autonomous mobile robots, and team leadership. Successfully managed Turkey's largest autonomous navigation project (187,000 m2).

PROFESSIONAL EXPERIENCE

Robotics Engineer | Saha Robotik, Istanbul, Turkey | November 2023 - Present

- Lead localization and mapping system for 200+ autonomous waiter/cargo robots operating 24/7 in commercial environments
- Managed complete project lifecycle for Turkey's first 24/7 autonomous airport guide robot at Istanbul Airport, covering 187,000 m2 with 25 km minimum daily travel
- Designed and implemented SLAM algorithms and control systems for autonomous navigation in dynamic environments
- Led ROS training program, providing remote instruction to university students in Azerbaijan
- Technologies: ROS2, C/C++, Python, SLAM, Control Systems, Autonomous Navigation

Student Researcher (Part-Time) | University of Southern Denmark (SDU), VP AURI Lab (dVRK Project) | October 2025 - April 2026

- Worked part-time (14 hours/week) under PhD supervision, contributing to the da Vinci Research Kit (dVRK) project.
 - Responsible for implementing and validating a simulation-based robotic control system (detailed in <https://arxiv.org/abs/2505.16596>) on the physical dVRK hardware.
 - Focused on bridging the gap between theoretical/simulated models and real-world application on a surgical robotics platform.
 - Technologies: dVRK, ROS1, C++, Python, Simulation
-

TECHNICAL SKILLS

Programming: C/C++, Python, MATLAB | **Robotics:** ROS2, ROS, SLAM, Localization, Sensor Fusion, Control Systems, Path Planning, Motion Planning | **Computer Vision:** OpenCV, YOLO, Object Detection | **Tools:** GitHub, Git, Linux, Docker | **Soft Skills:** Team Leadership, Project Management

EDUCATION

Master of Science in Advanced Robotics | University of Southern Denmark, Odense | January 2025 - Present

- Full scholarship recipient

Bachelor of Science in Mechatronics Engineering | Kocaeli University, Turkey | August 2019 - October 2024

- GPA: 3.2/4.0

CERTIFICATIONS

IELTS - Overall Band Score: 6.5 (Listening: 7.5, Reading: 7.0, Writing: 5.5, Speaking: 5.5)

VOLUNTEER EXPERIENCE

Team Lead | KOU-Mekatronom Autonomous Vehicle Team, Kocaeli University | November 2021 -

- Led 20-member student team developing autonomous vehicle systems for international competitions
- Selected as only Turkish finalist in Bosch Future Mobility Challenge (Top 24/160 global teams)
- Achieved 6th place in two consecutive Teknofest Robotaxi competitions
- Managed project planning, resource allocation, and technical development for autonomous driving stack
- Open-sourced project codes and tutorials to support future cohorts
- Still working as a mentor after 2024

Technologies: C++, Python, MATLAB, OpenCV, YOLO, ROS, Computer Vision, Path Planning

Volunteer Teacher | Bambu Voluntary Teaching Platform | January 2021 - August 2021

- Provided STEM tutoring for middle and high-school students during COVID-19 pandemic
